Professional Summary

AI & Machine Learning undergraduate with hands-on experience in backend development, computer vision, machine learning, and immersive AR/VR applications. Experienced in developing scalable REST APIs using FastAPI, building AI-powered software, and creating interactive XR experiences using Unity, Meta XR SDK, and Blender. Strong problem-solving skills demonstrated through 250+ LeetCode problems and multiple end-to-end software projects.

Education

GITAM University

Bachelor of Technology in Computer Science and Engineering (AI & ML)

2023 – 2027

CGPA: 8.70/10.00

Experience

Center for Extended Reality (CXR), GITAM University

05/2026 – 06/2026

AR/VR Developer Intern

- Developed immersive Virtual Reality and Augmented Reality learning experiences using Unity and Meta XR SDK.
- Designed and optimized interactive 3D assets and environments using Blender for real-time rendering.
- Built reusable XR interaction workflows and contributed to scalable application architecture.
- Collaborated with mentors and researchers to integrate immersive technologies into educational applications.

Skills & Coursework

Technical Skills:

Languages: Java, Python, SQL, JavaScript

Frameworks & SDKs: FastAPI, Unity, Meta XR SDK

AI/ML: Computer Vision, Image Classification, EfficientNet-B0

Developer Tools: Git, GitHub, Blender, VS Code

Databases: MySQL, MongoDB

Core CS: OOP, REST APIs, Software Engineering

Relevant Coursework:

Data Structures & Algorithms • Database Management Systems • Operating Systems • Computer Networks • Machine Learning • Artificial Intelligence

Certifications

Programming In Java — NPTEL Online Certification (IIT Kharagpur)

Jan – Apr 2025

Score: 70% consolidated (Assignments: 24.6/25 · Exam: 45/75) | Credential ID:

NPTEL25CS57S1160300244

Projects

AI Network Intelligence System

03/2026 – 04/2026

Python | FastAPI | Machine Learning | REST APIs

[Project Link](#)

- Developed an AI-driven network intelligence platform for predictive routing and optimization.
- Built scalable backend APIs using FastAPI and integrated machine learning decision logic.
- Designed simulation modules for intelligent network analysis.

Smart Classroom Attention Analyzer

2025

Python | EfficientNet-B0 | Computer Vision

[Project Link](#)

- Built an AI-powered classroom analytics system capable of recognizing 12 student behaviour patterns.
- Developed a real-time inference interface for classroom attention monitoring.

HealthKare

09/2025 – 10/2025

Java | SQL

[Project Link](#)

- Developed a secure healthcare management system with modular SQL-backed data storage.
- Implemented CRUD operations and structured database architecture.

Personal Finance Analyzer

03/2026

Python | Data Analytics

[Project Link](#)

- Built an expense analytics application providing budgeting insights through data visualization.

Achievements

- Solved **250+** Data Structures and Algorithms problems on LeetCode.
- Participated in Smart India Hackathon (SIH) and cleared the college-level screening round.
